Industrial

Our commitment to the customer begins with the design and manufacture of custom equipment and solutions, extending through installation, start-up, and maintenance.

We specialize in developing tailored solutions that ensure the reliability and cost-effectiveness of equipment and solutions.

Tashia's proposal

- Tailored solutions.
- Personalized technical advice.
- Extensive stock availability.
- Proactive installation and maintenance.
- Guaranteed regulatory compliance.
- Sustainable systems (ESG criteria).
- Advanced technologies for each sector.

TASHIA S.L.

At Tashia, we have been providing comprehensive and customized dosing and water treatment solutions since 1986.

With a focus on innovation and sustainability, we design, manufacture, install, and maintain equipment that optimizes efficiency and safety across industries.

Our dosing solutions are key to guaranteeing safety, quality, and hygiene in food and beverage production.

We offer precise and optimized solutions for the dosing of ingredients, additives, and preservatives, as well as for all cleaning and disinfection processes.

We optimize industrial processes with our customized solutions.

We guarantee the accuracy and reliability of our equipment, reducing energy consumption and increasing the productivity of each process.

Precision and sterility are essential in the pharmaceutical industry.

Our dosing systems ensure precise control in the preparation of formulas and active ingredients, meeting the industry's most stringent regulations.

In the energy sector, we pay close attention to every detail in dosing systems and water conditioning.

We deliver reliable, robust, and adaptable systems to address the challenge of energy generation and distribution.

From reagents to final products, the chemical industry demands robust, precise, and safe dosing and water treatment systems.

Our solutions guarantee consistent results in the most demanding and complex processes, ensuring safety and performance at all times.

Dosing

by  **Tashia**
Water Solutions

Dosing pumps

The TASHIA family of electric dosing pumps combines ease of use with high precision. Its advanced volumetric control simplifies and optimizes dosing operations. With adjustable ranges from 0.01% to 40%, pressure capacities up to 10 bar(g) and multiple configurations options, we have the right system to meet your dosing needs.

TD Pro

TD Acid

TD PRO SK

TD Advanced

XL TD Doser

In-Line Dioxer Pro

Batch Dioxer Pro

Chlorine dioxide generation

The BIOPURE® range of chlorine dioxide generation stations is designed for simplicity, ease of operation, efficiency, and safety. With an intuitive interface for effortless control, it provides a robust and reliable solution for disinfection processes.

Skids

We manufacture a wide range of customized solutions for dosing and process water treatment. From the analysis and selection of the optimal solution to manufacturing the equipment, at TASHIA, we design and produce tailor-made solutions upon request.

Water treatment

OMI RO

OMI RO XL

Reverse Osmosis

Our reverse osmosis systems guarantee optimal and suitable water quality for your process at all times. In addition to the standard models with capacities up to 9 m³/h, TASHIA also offers customized equipment upon request.

Electrochlorination solutions

TASHIA's electrochlorination systems enable the instant generation of a high-purity disinfectant efficiently safely. With a maximum capacity of 300 g/h, they are characterized by their ease of use, robustness, and simple installation.

CL Fresh

DDI

FMA

Water treatment

At TASHIA, we offer a wide range of proprietary water treatment systems that are reliable and efficient, including filters, water softeners, denitrifiers, and dechlorinators.

Measurement units

We offer parametric water measurement solutions for easy and precise quality control, with probes for detecting free chlorine, pH, conductivity, ClO₂, redox, and other parameters.

PRT-2B

Success stories

Find out how our solutions make a difference. Explore our installation success stories and see the results for yourself.

Accessories

Distribution panels

We tailor the design and manufacturing of modular panels to meet each customer's specific needs, providing solutions for any requirement. Panel mounting simplifies equipment installation, reduces costs, and ensures integration into any system. All equipment is rigorously tested and delivered with a full performance guarantee.

FE System

PT Compact

MIXER 125

Mixers

TASHIA's mixing solutions are the ideal choice for any mixing process. Designed and manufactured in-house, they are available in standard sizes of up to 260 liters and in special configurations upon request.

Meters

To complement our product range, we offer a wide selection of water meters tailored to each process. We configure the most suitable meter for every application, always optimizing performance and efficiency.

Hydrus

Volumetric meter

CRE pump

Hydro MULTI-E

Pumps

The pumping units supplied by TASHIA ensure a continuous and steady supply of water. The units are designed with both process requirements and energy efficiency in mind, optimizing cost savings in pumping operations.

Dosing

Hydraulic pumps

The DOSATRON range of hydraulic pumps ensures highly reliable and repeatable proportional dosing without the need for electrical power.

D3 STANDARD

D3 HIGH TEMP

D3 ATEX

D6 GREEN LINE

D9 STANDARD

D30 WATERLINE

Dosing pumps

Equipped with stepper motor and a unique digital dosing control, these systems set the standard for reliability and precision in dosing. Their electronic control enables consistent dosing with low pulsation and a wide regulation range.
